I am happy to provide a message for the Proceedings of the "National Seminar on Healthcare Associated Infection Prevention and Control" being organised by TwinTech Academy. I have known Mr. Mahalingam for many years since his stint at Sankara Nethralaya. Mr. Mahalingam is a superb organiser and a man with tremendous energy and zeal. He has been growing from strength to strength organising various medical events, seminars and workshop. This seminar entitled "Healthcare Associated Infection Prevention and Control" is a very important topic as infection control is of utmost importance and is often neglected. It has been estimated that a large percentage of the deaths that occur in hospitals is due to hospital acquired infections. This is very unfortunate since most of these infections are preventable if the proper guidelines are followed. In this context, this seminar on Healthcare Associated Infection Prevention and Control should be very useful for the attendees.

My very best wishes and heartiest congratulations to Mr. Mahalingam and his team for organizing this event.

**Conference Message**

I am delighted to know that TwinTech Academy Business Management Solutions Chennai is organizing a National Seminar on **Healthcare Associated Infection Prevention and Control** On the 23<sup>rd</sup> September 2017 at Chennai.

**Healthcare Associated Infection Prevention and Control** is highly relevant and crucial for all healthcare professionals around the world and in particular to the third world countries such as India. Reporting of mortality due to this type of infection is around 10 to 14% as reported by WHO. But it is a reality that patients walking into a hospital do acquire transmitted infections due to the patients, personnel and equipments. This affects not only the patients but also the personnel involved in helping the treatment process apart the environment.

There has got to be a continues creation of basic awareness about healthcare associated infections so that preventive and control measures can be put in place, thereby significantly reducing the risk elements involved.

I am sure the above seminar will immensely benefit the delegates in updating their knowledge through the deliberations with the eminent experts in the field. This will go a long way in extending a fool-proof system for the patients.

I pay my compliments to TwinTech Academy for embarking on the state of art programme and wish the participants of the seminar to have effective and involved participation to carry the good message for effective implementation. I am sure the participants and the TwinTech Academy will have a big success.

### MESSAGE

I am delighted to note that TwinTech Academy Business Management has come forward with yet another vital program on Health-care associated infections. This national seminar includes several workshops and expert interactions besides didactic sessions to be provided by eminent experts in the Health care industry.

Given the tenacity, commitment and wide experience of Mr. A. Mahalingam who has successfully organized several such programs, I am convinced that this will also be very well received by the delegates who attend the same. They will take home a lot of very useful information that they can use in their practice.

I wish to congratulate Mr. Mahalingam and his team for their efforts in putting this together as a full day National Seminar and wish them the level of success they expect.

**CONFERENCE MESSAGE**

I have known Mr A Mahalingam for now nearly a decade. I am impressed with the enthusiasm, zeal and passion he puts into whatever he does.

Hospital Acquired Infections are one of the most common preventable causes of increased morbidity and mortality, they can be prevented by something as simple as practicing effective hand hygiene.

Implementing bundles, a robust antibiotic stewardship protocol and a proactive Hospital wide Infection control program is the way forward to prevent the top causes of Hospital Acquired Infections and I am extremely pleased that the Twin Tech Academy Business Management solutions, Chennai is focusing on such an important topic.

My best wishes to Twin Tech Academy, the participants and Mr A Mahalingam for a successful program."

Warm regards,

**Dr Clive Fernandes, MD, MHA**

Group Clinical Director at Wockhardt Hospitals, Mumbai &  
JCI Consultant @ Joint Commission International

Infection control within hospitals will be the responsibility of all health care professionals, including doctors, nurses, laboratory technicians, paramedical staff, bio medical engineers and other hospital employees. The Infection controlling committee will be responsible for the continued surveillance of Healthcare Associated infections, development of a hospital antibiotic policy, and training of hospital workers on infection control.
